DETAILED ACTION

1. This office action is in response to applicants' remarks received on January 03, 2011. Claim 1 have been amended and claims 5, 11, 13 and 25 are canceled, Currently claims 1- 4, 6-10, 12, 14- 24 and 26- 28 are presented for examination.
2. Notice of non-compliant filed on December 03, 2010 have been withdrawn by the Examiner.

Examiner's Statement of Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose the claimed invention. **The features of independent claims 1, 10 and 17** directed towards allowable subject matter is "...a touch sensitive surface having a plurality of regions, each region corresponding to a selectable function; *an interface formed from a continuous flexible sheet of at least partially transparent material and disposed on the touch sensitive surface over the plurality of regions, the interface configured to provide tactile feedback to the user by flexibly deforming when pressed by the user, wherein the touch sensitive surface is at least partially transparent and wherein at least one of a system of lights and an electronic display are disposed under the touch sensitive surface and controlled by electronics configured to selectively provide light to each of the regions; and a rotary switch formed from the flexible*

Art Unit: 2629

sheet of the interface and configured for twisting relative to the at least one of a system of lights and the electronic display, wherein the rotary switch is configured to be twisted and to create one or more buckle points in the flexible sheet of the interface when twisted, the buckle points detectable by the touch sensitive surface.

Strasser et al. (US PG Pub No 2003/0128191) (Paragraph 14 and Fig 1 item 12 and 26) discloses a plurality of touch sensitive surface having a plurality of regions wherein each region (26) corresponds to selectable function (Paragraph 26 Fig 1 item 24).

(Paragraph 15 line 1-4 Fig 1 item 18) discloses operable element 26 comprises at least one transparent region 18. (Fig 5 item 30 and 12) discloses at least one of a system of lights (30) and an electronic display (12) are disposed under the touch sensitive surface (26). **Walls (WO 03/088164)** (Fig 2B-2E and page 11 line 19- page 12 line 6) discloses that the tactile feedback (i.e. interface) is pliable (i.e. flexible) and transparent. But Strasser et al. in view of Walls fails to discloses **a rotary switch formed from the**

flexible sheet of the interface and configured for twisting relative to the at least one of a system of lights and the electronic display, wherein the rotary switch is configured to be twisted and to create one or more buckle points in the flexible sheet of the interface when twisted, the buckle points detectable by the touch sensitive surface.

These features in combination with the remaining language of claims 1, 10 and 17 are not taught by the prior art of record. Therefore claims 1- 4, 6-10, 12, 14- 24 and 26- 28 are found to be allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
